EDUCATION

Masters in computer science	Texas A&M University Kingsville, USA	2022 - 2024
Bachelors in computer science	Vignan's Lara Institute of Science and Technology, AP	2017 - 2021

PROFESSIONAL SUMMARY

I am a passionate software developer with a focus on innovative solutions in technology. With extensive experience in various programming languages and frameworks, I excel at developing web applications and APIs. I strive for continuous learning and improvement to contribute effectively to impactful projects

EXPERIENCE

Teaching Assistant (Texas A&M University)	Aug 2023 – Aug 2025
- Assisted undergraduate students with programming concepts and assignments (Java, Python, C/C++, and Data Structures), helping them debug code and improve problem-solving skills. - Conducted lab sessions and doubt-clearing hours, explaining core CS topics such as algorithms, OOP concepts, and basic system design in a simple and practical way. - Supported the professor in grading assignments, quizzes, and projects, providing constructive feedback to help students improve code quality and logic. - Guided students on best coding practices, including clean code, time complexity optimization, and version control basics, improving overall assignment performance.	

PROJECTS

FindMyHotel	Live
- Developed a hotel search application using Next.js with Server-Side Rendering (SSR) to improve SEO. - Integrated external APIs to search and filter hotels by location, price, and amenities. - Built a responsive, user-friendly UI to enhance browsing and booking exploration.	
BlogMedium	Live
- Built a full-stack blogging platform using the MERN stack with Google OAuth authentication. - Implemented features to create, edit, and share blogs, including rich-text content and image uploads. - Developed scalable RESTful APIs using Express.js and MongoDB.	
WellnessTracker	Live
- Developed a Wellness Tracker application to monitor daily activities including meals, workouts, skincare routines, and tasks. Used Google authentication for secure and seamless login along with responsive UI. - Implemented state management and data persistence to maintain daily logs and user progress. - Integrated analytics/visualization features to help users track habits and identify wellness patterns over time.	
CryptoLivePrice	Live
- Built a Crypto Live Price application to display real-time cryptocurrency prices and market data. - Integrated third-party crypto APIs to fetch live prices, trends, and market metrics. Designed a responsive and intuitive UI for seamless user experience across devices. - Optimized data fetching and state updates to ensure fast and accurate price refreshes.	

SKILLS

Languages: C, C++, Java, Python, Go

Web Technologies: HTML, CSS, JavaScript, Node JS, React JS, Redux, Tailwind, Spring Boot, NextJs

Database: MySQL, MongoDB, PostgreSQL, Firebase

Tools & Technologies: Postman, Git

Platforms & IDE: IntelliJ, Eclipse, Android Studio, Visual Studio

CERTIFICATIONS

Node.js, Express, MongoDB & More the Complete Bootcamp — **Jonas Schmedtmann**

Modern React with Redux – A Complete Guide — **Stephen Grider**

Java Spring Framework 6 with Spring Boot 3 — **Navin Reddy**

Next.js 14 & React – The Complete Guide — **Maximilian Schwarzmüller**
